## Professional Summary

Experienced Backend Developer and Team Lead with a strong focus on PHP and Laravel With 7 years of experience, Practical experience in building robust, scalable web applications. Practical experience in various databases, microservices architecture, and DevOps practices. Skilled in developing high-performance backend systems, implementing efficient data management solutions, and optimizing application performance. Experienced in setting up and managing CI/CD pipelines, and Docker environments, and leading development teams.

## Technical Skills

- **Languages:** PHP, Golang
- **Frameworks:** Laravel
- **Databases:** PostgreSQL, MariaDB, MongoDB, InfluxDB
- **Caching:** Redis
- **Message Brokers:** RabbitMQ
- **DevOps:** Docker, Docker Swarm, Git, GitLab CI/CD, Docker Registry
- **Architecture:** Microservices, Event Sourcing
- **Testing:** Unit Testing, Feature Testing

## Professional Experience

### Backend Developer | *February 2023 - Present*

---

#### Arzinja | <https://arzinja.info>

- Developed backend systems for a crypto exchange platform using PHP/Laravel.
- Implemented microservices architecture for efficient pair synchronization and price management.
- Utilized RabbitMQ for inter-service communication, particularly with the match engine.
- Managed multiple databases including PostgreSQL, MariaDB, MongoDB, and InfluxDB.
- Implemented Redis caching to enhance application performance.
- Employed event-sourcing architecture to improve scalability and enable asynchronous operations.
- Created extensive unit and feature tests to ensure code quality and reliability.

**Stack** | PHP, Laravel, Docker, RabbitMQ, Event Sourcing, PostgreSQL, MariaDB, MongoDB, Redis, Jira

### Backend Developer | *April 2024 - October 2024*

---

#### Reunion marketing | <https://www.reunionmarketing.com>

- Developed a data analytics platform that provides businesses with insights about their performance and competitors based on Google Analytics data.
- Created features to extract, process, and display complex data sets from Google Analytics, enhancing user understanding of their business metrics.
- Implemented data visualization features using Google Maps API, allowing users to view geographical representations of their business data.
- Optimized database queries and implemented caching strategies to handle large volumes of analytics data with minimal latency.

**Stack** | PHP, Laravel, Docker, MariaDB, MongoDB, Redis, Asana, Google APIs

## Backend Developer and Team Lead | *January 2018 - September 2024*

---

### Dyacopardazesh

- Led backend development team, overseeing project execution and code quality.
- Created educational portals and exam platforms using Laravel.
- Designed and implemented backend APIs and database structures.
- Set up and managed a self-hosted GitLab instance for version control.
- Implemented CI/CD pipelines to automate testing and deployment processes.
- Configured and maintained Docker registry for efficient image management.
- Orchestrated deployments using Docker and Docker Swarm for scalability and easy management.
- Mentored junior developers and conducted code reviews to ensure best practices.

**Stack** | PHP, Laravel, Docker, MariaDB, PostgreSQL, Redis, Trello, CI/CD, Swarm, Docker Compose

## Backend Developer | *June 2021 - January 2023*

---

### BerNet | <https://nobaar.com>

- Developed backend APIs using PHP/Laravel for various projects, including a vehicle and worker hiring app (Nobaar).
- Implemented microservices architecture for efficient real-time price with multiple map providers.
- Implemented asynchronous order handling using Laravel queues and Redis.
- Optimized complex pricing calculations and real-time reporting capabilities.
- Designed efficient database schemas and optimized queries using MySQL views.

**Stack** | PHP, Laravel, Docker, MariaDB, Redis, Trello

## Backend Developer | *November 2021 - January 2022*

---

### Zhaket | <https://www.zhaket.com>

- Contributed to building a marketplace platform using PHP/Laravel for the backend.
- Designed and implemented backend architecture and APIs.
- Developed caching mechanisms using Redis for improved performance.
- Worked with MongoDB for NoSQL data and PostgreSQL for relational data management.

**Stack** | PHP, Laravel, Docker, PostgreSQL, MongoDB, Redis, Jira

## Backend Developer | *June 2017 - May 2020*

---

### RungAndRoll

- Refactored an e-commerce platform from Magento2 to Laravel.
- Implemented backend logic and integrated with third-party stores.
- Utilized Redis caching to boost application performance.
- Optimized backend processes for improved PageSpeed scores and SEO.

**Stack** | PHP, Magento 2, WordPress, Laravel

## Education

### Bachelor's Degree in Computer Science

Arak University | January 2013 - September 2017
